Immuno Care^{®MD}

REGULATE YOUR IMMUNE SYSTEM

Celt Immuno-Care[®] is a patented and clinically tested plant sterol and antioxidant supplement that regulates your immune system by "up-regulating" it when its under-performing, such as when you're sick, and "down-regulating" it when its over reacting, such as when you're suffering from allergies. It is also a superb anti-oxidant for the maintenance of good health.

FAQ

IMMUNO-CARE – IMMUNE SYSTEM REGULATOR AND SUPPLEMENT

Other supplements contain plant sterols, but there is a key reason why Immuno-Care is simply better—the active sterols and other important nutrients are protected from the harsh conditions of the stomach by an enteric coating that allows the ingredients of each capsule to arrive intact in the small intestine. There the capsule can release its maximum potential, and get to work regulating your immune system.

Immuno-Care is approved and certified by Health Canada and manufactured in a GMP facility in Canada. All raw materials are first tested for purity and potency. If they do not meet our standards they are rejected sent back or destroyed. Immuno-Care has 3 patents, which ensures the highest scrutiny from government and patent lawyers and bio-medical researchers.

Many health conditions, especially auto-immune disorders, respond well to Immuno-Care, and have been clinically shown to improve with daily use. Immuno-Care increases anti-oxidant levels which protect the body's cells from harmful free radical and DNA damage and reduces inflammatory markers C-reactive protein and IL-6. These markers are usually spiked with many immune related conditions.

Here is a list of some examples: psoriasis, eczema, rheumatoid arthritis, heart disease, high cholesterol, type 2 diabetes, asthma, allergies, chronic fatigue, maintain a normal thyroid gland, dysfunctional cell growth and the common flu.

HIGH STANDARDS OF QUALITY ASSURED

Our manufacturing facility is GMP licenced to the highest standards. Immuno-Care has an NPN number. This is a special licence granted by Health Canada after they have researched a product over a long period of time. This should give consumers a high level of confidence regarding the amount of scrutiny Immuno-Care has received from government regulators. Immuno-Care contains: Free plant sterols, flax seed extract, grape seed extract, bovine colostrum, selenium, vitamin E and zinc.

HOW TO BEST TAKE IMMUNO-CARE

Taking Immuno-Care is very easy. The morning dose has been shown to be the best dose of the day.

MAINTENANCE DOSE

On rising, take one capsule of Immuno-Care on an empty stomach, wait 20 minutes before eating a normal meal. Do not take Immuno-Care with dairy products for the first 20 minutes, then you can consume dairy if you like. By doing this you will make the plant sterols more active.

ACUTE FLARE UP

Many practitioners like to do a loading dose, 2 capsules morning, and then repeat later in the day maybe before dinner for the second dose. Hold this dose for approx. 5-7 days. Then if the symptoms are subsiding, reduce the dose to 2 capsules daily, one morning one evening.

Milk and other dairy products can block the absorption of plant sterols, they are very similar to cholesterol in structure and compete for cellular receptors, so avoid taking with dairy.

YES—Immuno-Care is safe for all dietary restrictions, including vegetarians and people on restricted diets such as starch free, preservative free and gluten-free.

NOTE: If you are on blood thinners, anti-biotics, or having surgery, pregnant or breast feeding please consult with your physician. Organ transplant recipients must NOT take this product.
